SHORT INTRODUCTION

FRAMEWORK
CodeIgniter 3.1.5

LIVE DEMO
http://stronawww.klodzko.pl

FRONTEND
bootstrap.css
Source: http://getbootstrap.com/

CONTROLLERS
application/controllers

Main controller: Main.php

MODELS
application/models

VIEWS
application/views

CONFIGURATION
application/config

XML TEMPLATES
files

TEST DATA FOR THE TASK
files/template1.xml

XSD
files/template.xsd

OTHERS
1. Others templates: files
2. applications/core/MY_Controller.php

CodeIgniter by default doesn't implement layouts and templates. I have written
MY_Controller.php to handle layouts.
